SECTION - C

(Language Component)

VI. Make notes either in Linear format or flowchart for the following passage: (1×5=5)

Flowering plants are of various types. Herbaceous flowering plants grow, set seed and die within one year; biennial plant completes their life cycles in two years; Perennials on the other hand, can live and grow for many years once they have been planted. Plants that flourish and flower during the rainy season are mostly herbaceous annuals such as the Aster, Zinnia, and sweet pea. Of the herbaceous perennials the most common are members of the Daisy family. The beautifully scented Rose and Jasmine are both Woody and Semi-Woody perennials. There are two other types of plants; bulbous plants and aquatic plants. The farmer grow from bulbs and tubers planted in the ground; examples of this type are Gladiolus and Tulip. The latter, as their name suggests, grow in water, the most exquisite example being the Lotus or Water Lilly. Both bulbous and aquatic plants are usually perennials.
